TRANSFER CREDIT

Up to nine credits may be accepted from another regionally accredited school toward a master's degree earned at Cardinal Stritch University. Doctoral-level credits from another regionally accredited school may be accepted towards a doctoral degree earned at Cardinal Stritch University; the maximum number of credits is limited to 50% of the degree. Each college has residency requirements for the major that may be above and beyond what is articulated for the University. Program residency requirements are published in each college's program materials. Once credits are accepted in transfer at the University, the credits will be applied to any college based on the college's major/program requirements (subject to further restrictions by individual departments). These credits may include credits which have already been applied toward completion of another graduate degree program. No coursework may be applied toward a degree if it is more than seven years old at the time of graduation. Students must provide Cardinal Stritch University with official transcripts substantiating transfer coursework. All coursework must have a letter grade ("A" to "F" or equivalent) to be considered. Only graduate coursework with an equivalent grade of "B-" and above will qualify for transfer to graduate degree programs at Stritch. Doctoral coursework with B or better (or its equivalent) will qualify for transfer to a doctoral degree program at Stritch.

Undergraduate courses recognized as meeting graduate prerequisite requirements must have a grade of "C" or better. Undergraduate courses used to meet post-baccalaureate certification requirements must have a grade of "C-" or above. (Subject to further restrictions by individual Colleges.)

Psychometry Concentration

This concentration is intended for students who wish to pursue a career in psychological test administration in neuropsychology, educational settings, or research. Graduation with the psychometry concentration will require 30 credits, including the following in addition to the classes required for the general degree:

- PSY 549 Assessment II
- 6-12 credits from PSY580 Practicum and/or PSY553 Internship (400+ hours of clinical experiences)

Recommended but not required: PSY557 Biological Bases of Behavior, PSY570 Career Development
